melrose CASTILE LIQUID SOAP

THAT'S CLEARLY ORGANIC!

Proudly made in Australia

NATURAL SKIN CARE

Clearly Organic

Melrose Organic Castile Liquid Soap offers an ideal alternative to ordinary soap.

Proudly made in Australia. Melrose Organic Castile Soap is closer to nature. Traditionally formulated from the purest organic unrefined vegetable oils: Organic Olive, Coconut, Palm Kernel, Flaxseed, Safflower and other certified organic oils.

No preservatives, animal ingredients or synthetic detergents. Suitable for all skin types.

- Certified organic by ACO
- 100% biodegradable
- No synthetic detergents
- No animal ingredients
- Not tested on animals
- No preservatives
- Incredible value

Especially For Dry & Sensitive Skin

Melrose Organic Castile Soap is preferred by people with dry and sensitive skin. Years of use has given excellent results.

Moisturising Oils

Melrose Organic Castile Soap is made in the traditional way from organic virgin olive, coconut, palm kernel, flaxseed, safflower and other certified organic vegetable oils. Beautiful, clean, healthy skin clearly begins with Melrose Organic Castile Soap.

Pure & Mild

Castile soap has been known to generations of Australians as the purest, mildest soap available.

All Purpose Soap

Melrose Organic Castile Soap is a simple solution for grooming and cleaning needs. It is the perfect invigorating bath and shower soap.

Great clean and fresh feeling

Apply to wash cloth or loofah clean all over for the freshest, cleanest feeling possible. Use this versatile soap in the kitchen for washing fruits and vegetables, cleaning benchtops, walls, floors and bathroom. It's even mild enough for bathing your pets and washing the car.

The soap comes in a 500mL convenient pump pack and a handy 500mL flip top refill. Great value at 500 pumps per bottle, around 1.5 cents per use. A smaller foam pump in 300mL will look elegant on your bathroom basin.

Frequently asked Questions

What is the pH?

All true soaps have a pH of between 9.5 and 10.

Why is the soap sometimes cloudy?

Some vegetable oils contain a small percentage of waxes, lecithin and other unsaponifiable matter that do not dissolve in the reaction to make soap. These remain and eventually float to the top.

Why are some batches darker than others?

Unrefined Organic oils are not bleached and vary in colour. The presence of minute traces of iron also result in the soap darkening with age.

What if I get it in my eyes?

It stings. Flush with ample clean water. The effect is temporary.
